

The DPFi™ Emissions System Electrically Regenerated Diesel Particulate Filter

Finally An Emissions Solution for vehicles with low exhaust gas temperature

The Underground Mining DPFi integrates an electrical heater with the DPF to clean the filter. Simply plug the DPFi into 240V electrical supply for 90-minutes at the end of each shift.

- › Replaces OEM muffler
- › For low exhaust gas temperatures (<200°C)
- › Does not produce/add NO₂ to the mine
- › Reduces exhaust particle number up to 99+ %
- › Tier-0 engine retrofit to current emission standards
- › Cab mounted display provides operational data
- › Plug-in 240V filter regeneration
- › Regen between shifts for 90-minutes
- › For vehicles up to 150 kW power range
- › CSA and UL listed, VERT certified, MSHA certified
